# FEATURES & BENEFITS

## ■ 3-POINT LOCKING

All our hinged and sliding doors come with 3-point locking as standard - this means added security.

## ■ CAN BE CONSTRUCTED OUT-OF-SQUARE

If your door space isn't exactly square, don't worry. Our doors can be cut to suit any opening without a loss in strength.

## ■ ATTRACTIVE MID-RAILS

Our midrail is an attractive feature that can be positioned to match existing features of your home. It boosts the door's strength and anti-jemmy properties and also acts as a visual warning so you don't walk into the door.

## ■ SCREW-CLAMP™ SECURITY

Only Crimsafe clamps 304 Tensile Tuff® Security Mesh between 2 serrated pieces of metal, then drives a screw right through both mesh and frame to ensure a vice-like grip.

## ■ TAMPER-RESISTANT SCREWS

Exclusive to Crimsafe. Screws can only be applied or removed by a tool registered with Crimsafe.

## ■ ENHANCED LIFESTYLE

Crimsafe provides unhindered views, keeps out mosquitos, and lets you keep a cool, safe house in summer.

## ■ AUSTRALIAN STANDARDS

Crimsafe always exceeds the relevant Australian and industry standards for security.
