

CLEARVIEW SECURITY

Crimsafe fixed security screens are non moving panels that can be fitted to almost any window type. These panels can cover just the opening section or the full window with a variety of different frame types.

FEATURES & BENEFITS

■ EASY INSTALLATION

Crimsafe Security System products are custom built off-site, then quickly installed at your home.

■ SMALLER FRAME SECTIONS

Boasting the strength of door frames, but with a smaller frame width.

■ SLIMLINE DESIGN

Heavy duty protection without heavy duty looks. A cross-section reveals the Crimsafe standard frame is only 11mm thick and 35mm wide.

■ SCREW-CLAMP™ SECURITY

Only Crimsafe clamps 304 Tensile Tuff® Security Mesh between 2 serrated pieces of metal, then drives a screw right through both mesh and frame to ensure a vice-like grip.

■ TAMPER-RESISTANT SCREWS

Exclusive to Crimsafe. Screws can only be applied or removed by a tool registered with Crimsafe.

■ CONCEALED FIXINGS

Ask about Crimsafe Conceal-Fit frames which have a clip in cover to hide the fixings - making it an attractive and neat option.

■ ENHANCED LIFESTYLE

Crimsafe provides unhindered views, keeps out mosquitos, and lets you keep a cool, safe house in summer.

■ BLOCKS HEAT TRANSFER

Blocks out 53% of solar heat gain through windows, keeping your home cooler in summer and warmer in winter. Save on power by reducing running cost of air-conditioning.

■ AUSTRALIAN STANDARDS

Crimsafe always exceeds the relevant Australian and industry standards for security.
